

CTG PLATFORM:

A satellite-connected protection system designed for remote expeditions.

ACTIVATE SOS

In an emergency, press the SOS button on the Tracer M3 device. The device sends a satellite distress signal with your exact GPS location.

SIGNAL TRANSMISSION

The signal is transmitted through the global satellite network to the Himalayan Guardian coordination center.

RESCUE COORDINATION

Our emergency response team evaluates the situation and coordinates rescue operations with our local partners.

RAPID RESPONSE

Depending on the location and severity, rescue may include helicopter evacuation or ground response.

MEDICAL SUPPORT

The traveler is transported to the nearest medical facility and insurance coverage support begins immediately.
